Hiroyasu HAMAMURA et al.
Serial No. 10/663,742
Response to Office Action dated November 28, 2005

Amendments to the Specification:

Please replace the paragraph beginning on page 7, line 3 with the following amended paragraph:

In the present embodiment, a variety of image data such as image data picked-up and output by camera portion 3 can be stored and retained in retention memory 7. When the listing of image data retained in retention memory 7 is displayed, the images based on the image data are listed on display portion in the form of shrunken images, that is, so-called thumbnails, as shown in Fig. 4. The procedure for displaying the thumbnails shown in Fig. 4 will be explained in greater detail below with reference to Figs. 9-11. When the image data in retention memory 7 is listed in the form of thumbnails on display portion 10, the thumbnail images are displayed in the order of thumbnail positions SD(1)-SD(9) in a screen. When there are more than nine thumbnails, the remaining thumbnails can be listed, as shown in Fig. 4, by requesting the next screen.
